Inspiration:

Pros & Cons

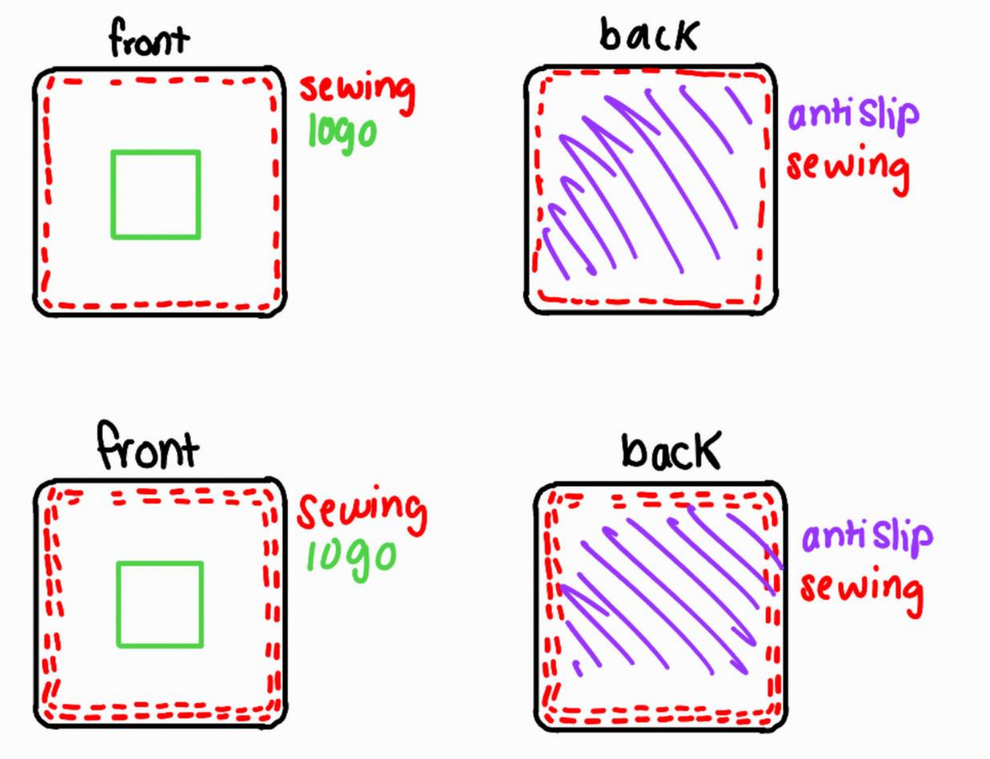

- Fits the company’s minimalist aesthetic and brand identity.
- Durable product with a long life cycle.
- Features a timeless and versatile design.
- Offers personalization options, such as engraving.
- Doesn’t overlap with current product offerings.
- Appeals to professionals and design-conscious buyers.

- Depending on the design, it could be difficult to produce.
- Faces strong competition from cheaper alternatives on Amazon.
- Typically, customers only need one laptop case, limiting repeat purchases.

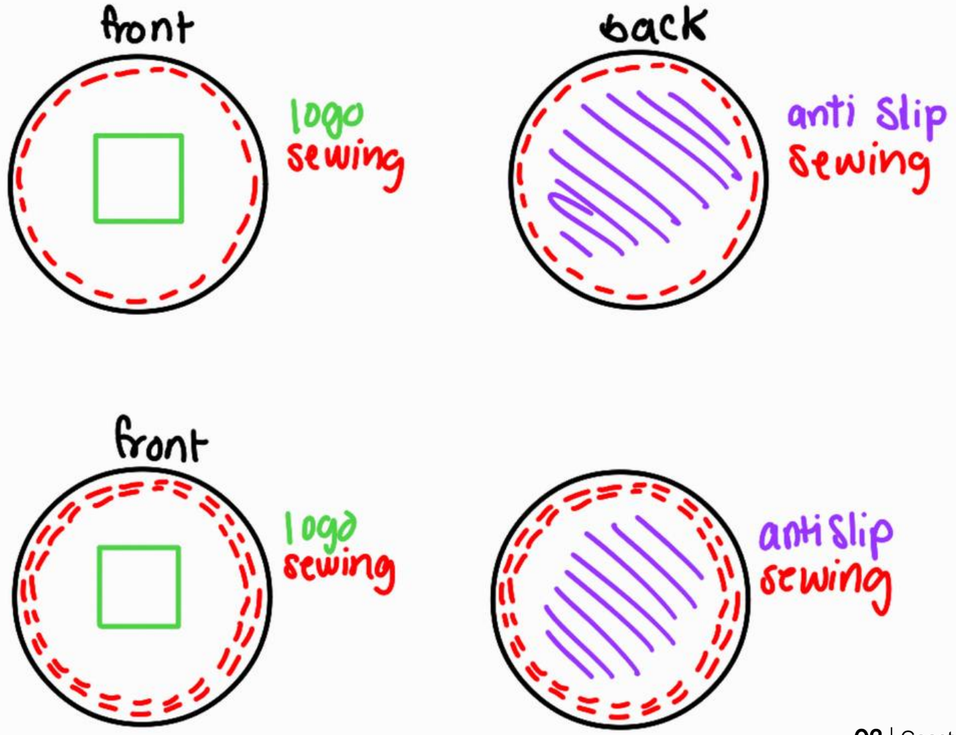

Coasters

Made from premium Italian cowhide leather, our coasters are durable and easy to clean, designed to protect your surfaces from spills and stains while adding a touch of luxury to any setting. Personalize your coasters with custom laser engraving.

Price range for 6 pieces

10€ - cheaper version
70€ - handmade, genuine leather

Inspiration:

Pros & Cons

- Fits the company’s minimalist aesthetic and brand identity.
- Simple design that should not be too difficult to produce.
- Offers personalization options, such as engraving.
- Typically bought in sets, increasing sales volume.
- Anti-slip bottom could serve as a unique selling point

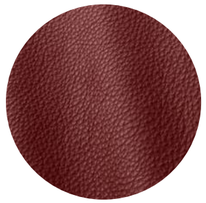

- For smaller items, people often prefer cheaper alternatives.

Leather Testing

Over four days, I tested the heat resistance of eight types of leather, performing two tests per day on each, for a total of eight evaluations per leather. During the tests, I carefully observed changes in texture, flexibility, and durability when exposed to heat. This thorough approach provided detailed insights into how each leather type performs under high temperatures, offering valuable information for determining their most suitable applications.

Leathers: Schwarz , Champagner, Nussbraun, Cognac, Weinrot, Smaragdgrun, Basaltgrau, Cognac Vintage

Weinrot:

- Tests revealed that prolonged heat exposure worsens marks on Weinrot leather over time, with more severe effects compared to Schwarz leather.

Champagner:

- Champagner leather demonstrates a remarkable ability to resist heat exposure, with minimal and barely noticeable marks forming over time.

Cognac:

- These tests demonstrate that Cognac leather has a notable resistance to heat, with only minimal and transient marks forming over time.

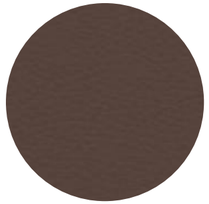

Schwarz:

- After testing it for 4 days , it results that the leather its not heat resistant and it left marks.

Nussbraun:

- These tests indicate that Nussbraun leather shows a gradual increase in visible marking with prolonged heat exposure.

Cognac vintage:

- These tests suggest that Cognac Vintage leather exhibits a commendable resistance to heat, with only minimal and faint marks forming over time

Smaragdgrun:

- These tests suggest that Smaragdgrun leather gradually develops visible marks and creases with prolonged heat exposure, becoming more pronounced over time.

Basaltgrau:

- These tests suggest that Basaltgrau leather gradually develops visible marks and creases with prolonged heat exposure, becoming more pronounced over time.

Conclusion

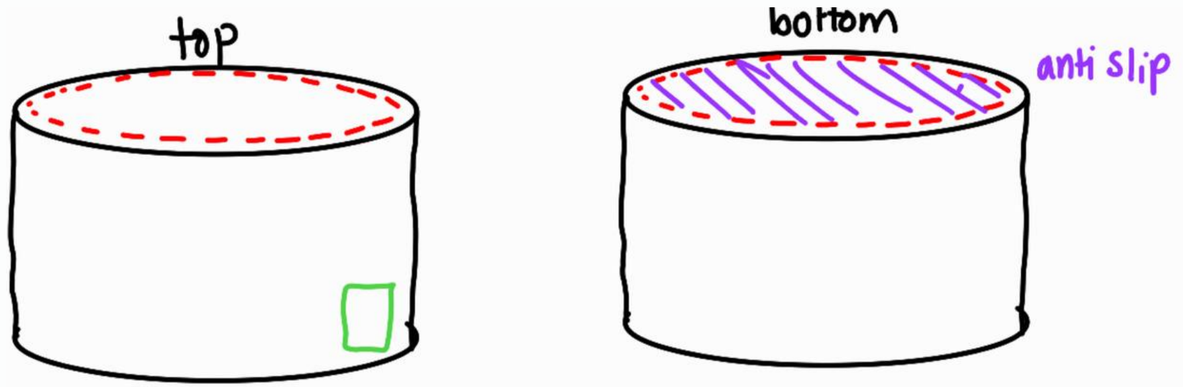

The heat tests showed clear differences in how leather types handle high temperatures:

Schwarz and Weinrot leathers performed poorly, with marks worsening over time.
Champagner, Cognac, and Cognac Vintage held up well, showing only minor, temporary marks.
Nussbraun, Smaragdgrun, and Basaltgrau were moderately resistant, developing marks and creases with longer exposure.

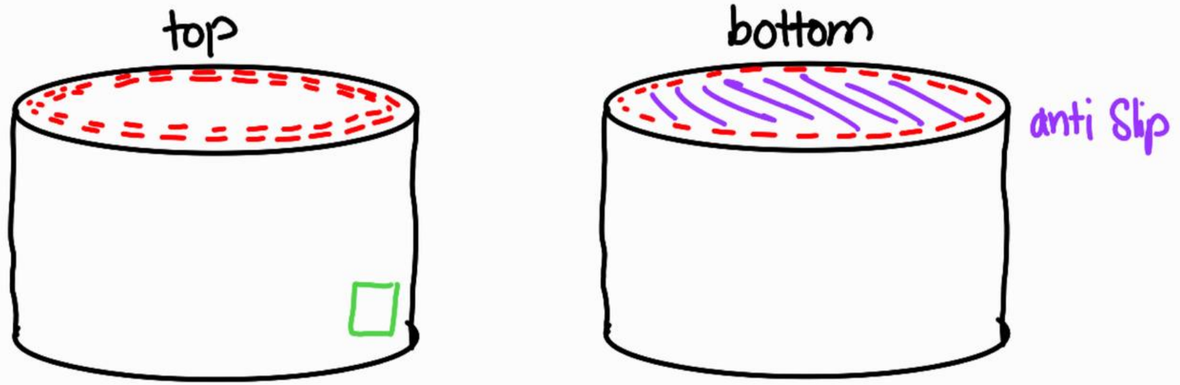

Pouf

Made from premium Italian cowhide leather and hand-sewn in Germany, our pouf is both decorative and practical. Whether used as a footrest, extra seating, or as a stylish accent, it complements any space. The anti- slip base ensures stability on all surfaces. Personalize your pouf with custom laser engraving.

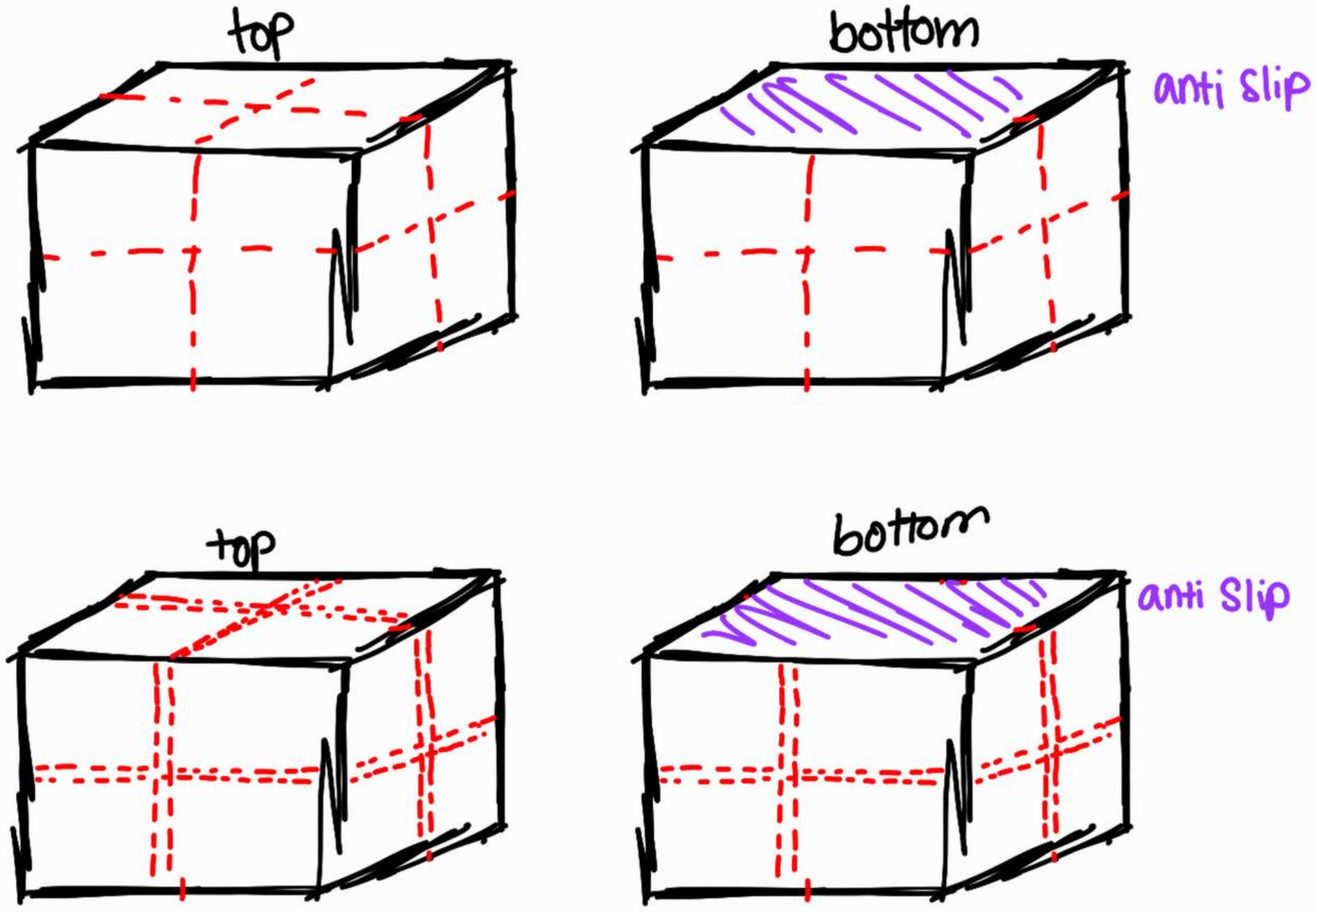

Price range

110€ - cheaper version
300€ - handmade, genuine leather

Pros & Cons

- Fits the company’s minimalist aesthetic and brand identity.
- Complements other products, such as cushions.
- Durable product with a long life cycle.
- Features a classic look that complements various interior styles.
- Anti-slip bottom could serve as a unique selling point.

- Depending on the design, it could be difficult to produce.
- Larger size requires more storage space and increases shipping costs.

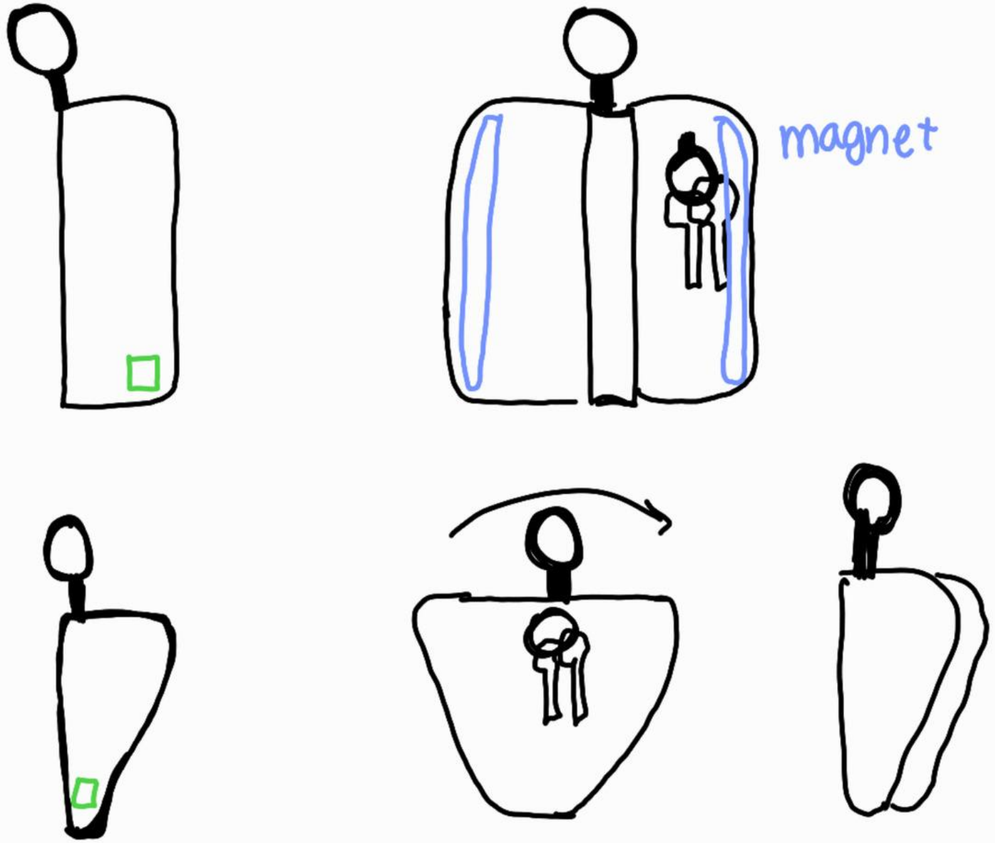

Keychain holder

Made from premium Italian cowhide leather in a small, thoughtful design, our key holder keeps your keys secure and easily accessible, adding a touch of elegance to your everyday essentials. Personalize your key holder with custom laser engraving.

Price range

15€ - cheaper version
60€ - handmade, genuine leather

Inspiration:

Pros & Cons

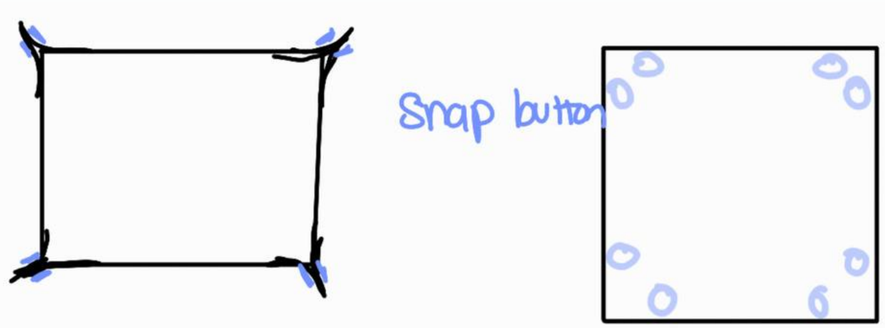

- Functional design that keeps keys organized and protected.
- Can be crafted from smaller pieces of leather, reducing material waste.
- Offers personalization options, such as engraving.

- May not accommodate a large number of keys.
- For smaller items, people often prefer cheaper alternatives.

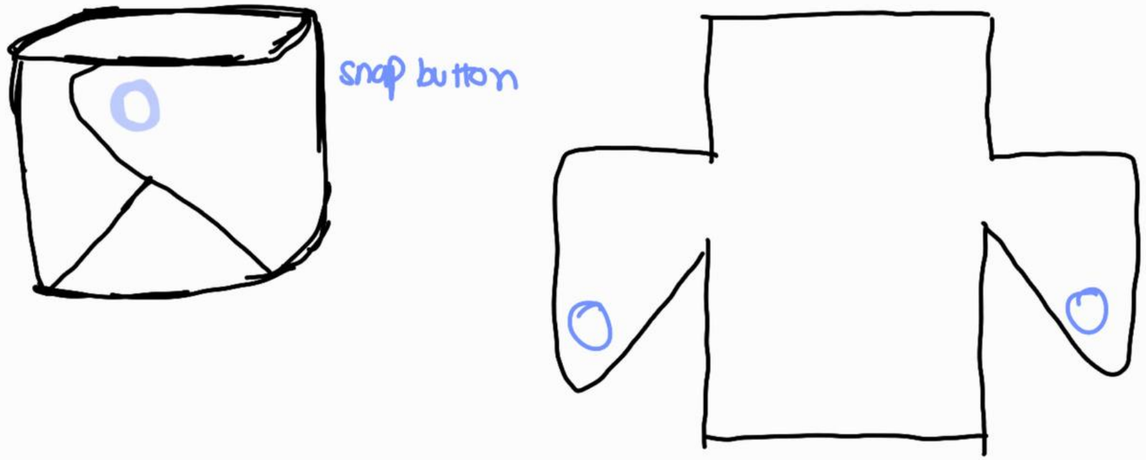

Penholder & Folding Tray

Made from premium Italian cowhide leather and hand-sewn in Germany, our versatile leather tray keeps your essentials organized and always within reach, whether at home or in the office. Personalize your tray with custom laser engraving.

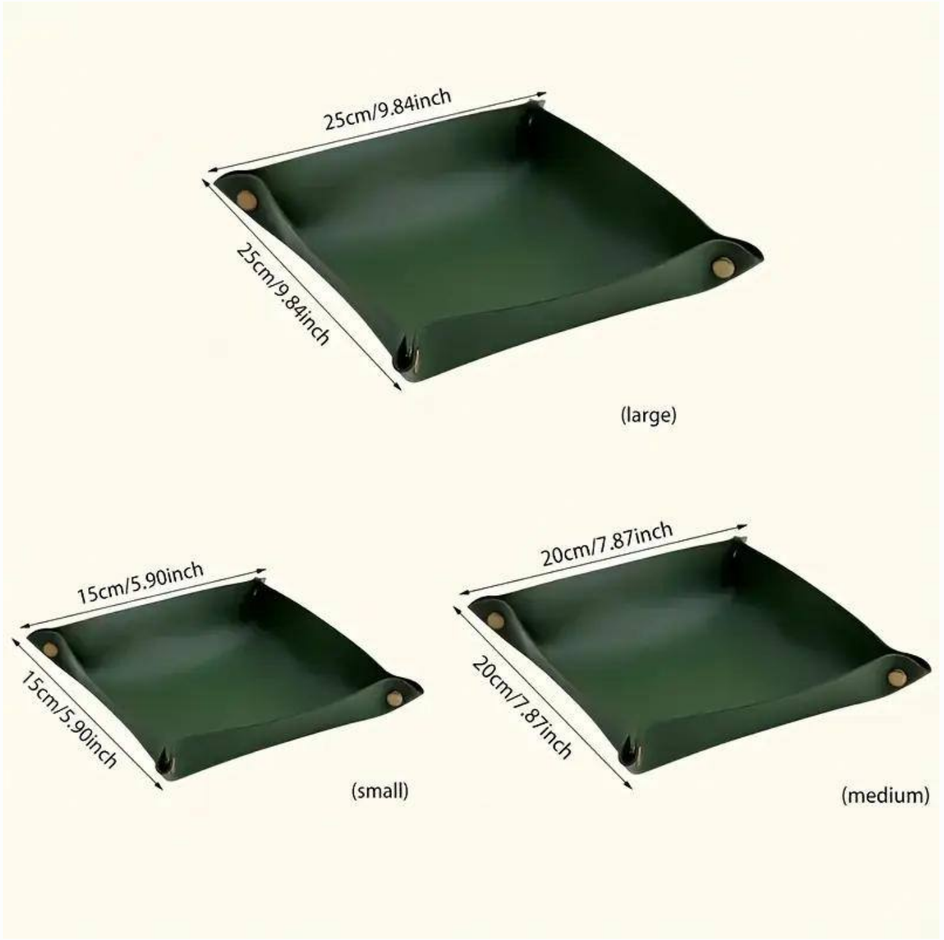

Price range

25€ - cheaper version
95€ - handmade, genuine leather

Inspiration:

Pros & Cons

- Functional and versatile design suitable for multiple uses.
- Complements other products in the company’s range.
- Simple design that should not be too difficult to produce.

- May require thicker leather, which could increase production costs.

Improvement Suggestion

Introduce personalization options (laser engraving)

The Progress

- Conducted an initial assessment and created sketches for products that align with the company's theme and office leather product line.
- Researched and evaluated materials suitable for the new products.
- Tested leather samples to determine heat resistance and overall suitability.
- Selected products that can be manufactured using existing machinery.
- Established a price range for the proposed products.

What to Expect on 10th Feburary

- Deliver the final selected products.
- Provide detailed sketches, including blueprints.
- Supply exact measurements of products and required leather sizes.
- Identify and recommend new materials if necessary for specific products.
- Offer various product sizes to give customers the freedom to choose.
- Conduct research and present the final cost, ensuring it aligns with your expectations.
- Ensure the product descriptions are ready and finalized
