Expanded Reality

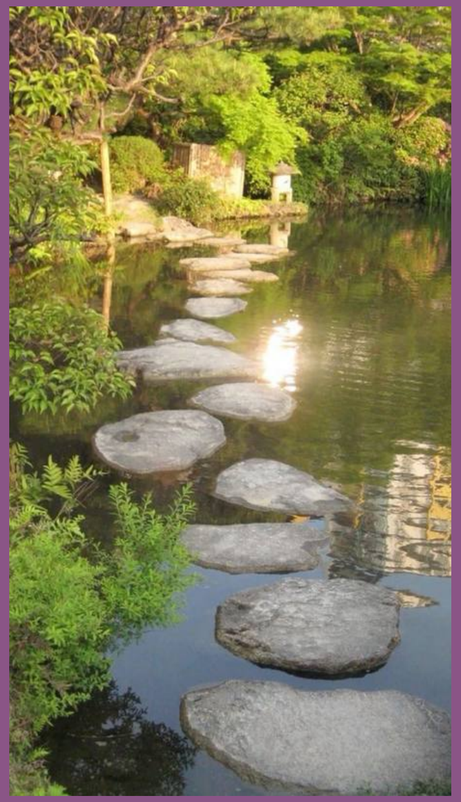

About the Project

This project explores the idea of entering a dream world — a transition from reality into a soft, magical, ethereal realm. It blends fantasy and nature, using doors as symbolic portals into peaceful, enchanted environments filled with forests, water, wildlife, and a majestic pink castle. The theme focuses on escapism, serenity, and wonder, creating a cinematic journey through a world that feels gentle, surreal, and emotionally calming. It’s about discovering beauty and magic hidden beyond the ordinary.
